# AMO Quality Assurance Program

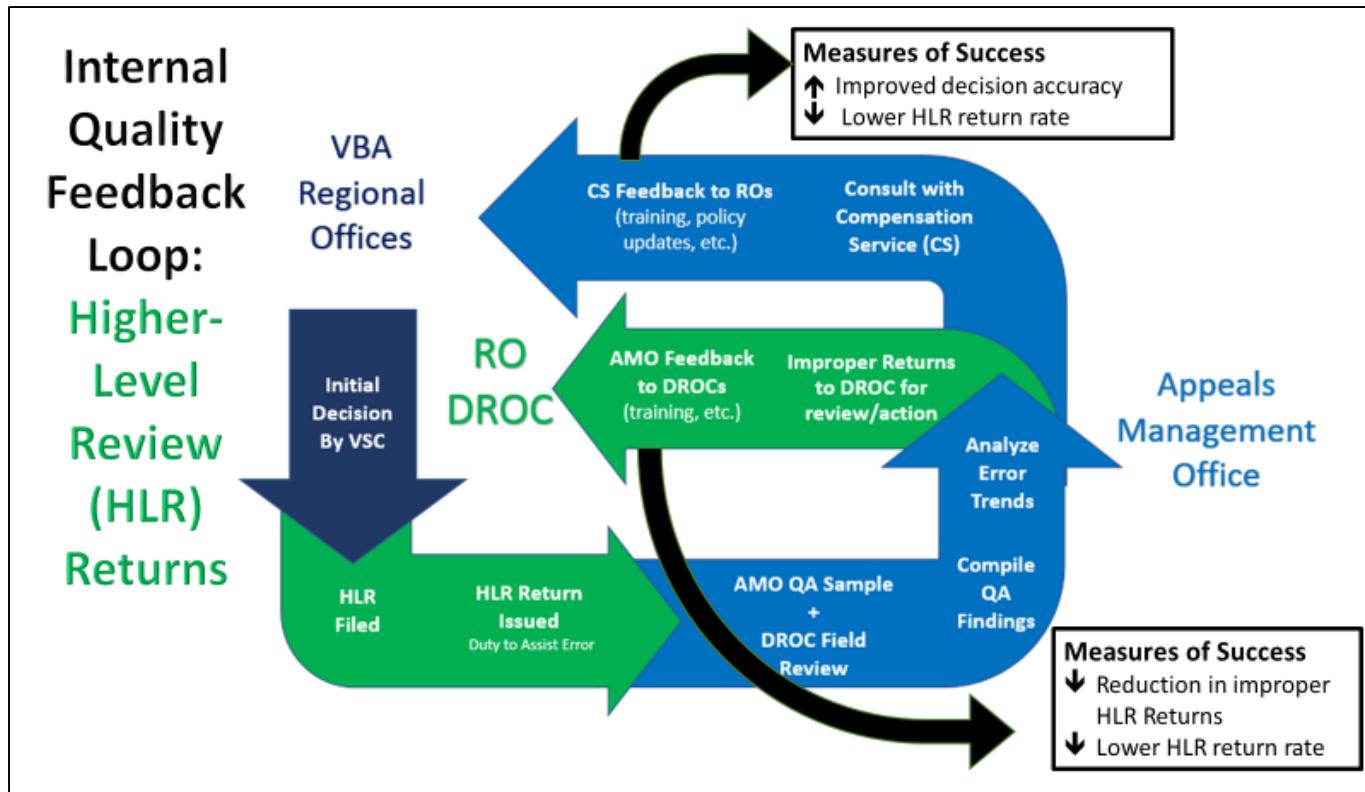

AMO Quality Accuracy - August 31, 2019			
Rating Reviews	June-19	July-19	June - July 2019
	Issue Based(IB) Accuracy	IB Accuracy	IB Accuracy
Total	100.0%	94.6%	97.2%

- In FY19, AMO is finalizing a quality review trial period to assess baseline quality of higher-level reviews
  - VBA's quality target for the higher-level review process is **96%**
  - Cumulative issue-based quality accuracy to date is **97.2%**
- In FY20, AMO will establish a statistically valid sample size for HLRs and begin monthly reporting of National accuracy rates
- AMO will conduct monthly calls with field offices to discuss identified error trends and policy/procedural guidance

# AMA Quality Feedback Loop

AMA also provides a quality feedback loop for improved decision quality from:

- Returns from the Higher-Level Review Lane, and
- Board Remands

VBA is leveraging data gathered from the feedback loops to improve accuracy at the initial decision level through:

- quarterly collaboration sessions with the Board and other VBA stakeholders,
- development of training materials to address error trends, and
- updates to policy/procedural guidance to ensure field personnel apply the laws and regulations appropriately the first time.
